

# More efficient IT with Kyndryl Services for Red Hat Ansible Automation Platform

Speed productivity, manage complex IT, and scale your IT automation

## Challenges to achieving IT modernization and automation

CIOs, CTOs and IT decision-makers face growing pressure to deliver better results from their IT investments. They need to modernize their IT for improved flexibility, agility, and faster innovation value. Existing infrastructures for managing and maintaining IT configuration, security, and application deployment often cannot meet today's demands.

The journey to modernizing enterprise IT environments is more complex than installing updated tools. New solutions need an automation framework that is reused across your lines of business and functional IT areas, including DevOps, security, and business continuity. Typical challenges include:

- A lack of visibility across hybrid and multicloud platforms
- Limited internal expertise with automated cloud infrastructure management
- An inability to economically orchestrate, secure, and manage workloads on-premises or across clouds.

## Kyndryl end-to-end IT management

Kyndryl services provide an end-to-end service model to advise, build, and manage your automation framework to help transform your mission-critical systems. This solution is designed to help you:

- 1** Modernize, automate, and improve efficiencies of your IT practices
- 2** Enable the integration of key industry requirements for resiliency, security, policy governance, and compliance
- 3** Collaborate across your organization to create, share, and manage automation – from development and operations to security and network teams

Gain IT operational efficiency and innovation with Kyndryl. Create your IT automation strategy from definition, design, and implementation through management of your automation framework with Red Hat® Ansible® Automation Platform.

## Kyndryl Services for Red Hat Ansible Automation Platform

Kyndryl and Red Hat together bring best practices, standards, and the experience to manage diverse environments which span infrastructure, applications, and processes. More specifically we deliver significant productivity, agility, and operational gains which are an important pillar of enterprise infrastructure modernization. This helps minimize errors and improve stability. Work across every cloud environment with better automated IT scaling, control, and insight.

Kyndryl is one of the leading service providers of enterprise automation with Red Hat Ansible Automation Platform, with approximately 850 clients served and 550,000 endpoints managed. With thousands of Red Hat technical certifications and hundreds of Red Hat sales accreditations, Kyndryl offers customers deep and unique Red Hat expertise.

Kyndryl is the world's leading user and provider of enterprise automation with the Red Hat Ansible Automation Platform.
