

# Kyndryl + NetApp: Modernizing healthcare with confidence

## It's a hybrid cloud world

Today's healthcare organizations are managing growing volumes of clinical, imaging and operational data across hybrid environments.

80%

of healthcare organizations  
already operate in public  
cloud environments<sup>1</sup>

## Resilience is personal

Healthcare remains one of the most targeted industries for cyberattacks, where disruption doesn't just mean downtime — it directly impacts patient safety.

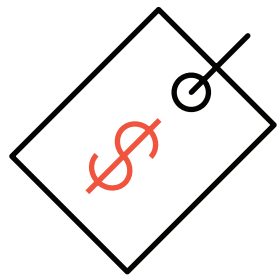

213 days

Typical time to detection in  
healthcare data breaches<sup>2</sup>

## Regulatory readiness

Data protection is essential to manage sensitive healthcare data responsibly and meet governance, security and audit requirements.

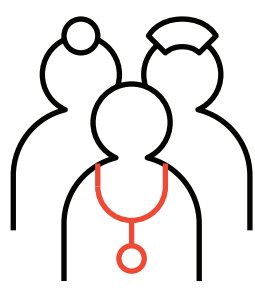

\$10M

Average cost of a data breach<sup>3</sup>

## Accelerate AI innovation

A secure, high-performance data foundation is vital to scale AI initiatives, unlock actionable insights, and enhance clinical and operational outcomes.

50%

of physicians support their diagnostics  
and clinical decisions with AI <sup>4</sup>

Kyndryl and NetApp can help. Our unified modernization platform for healthcare delivers flexible, resilient foundation to support cloud growth, cyber resilience, regulatory compliance and AI initiatives at scale.
