

# Boost business resiliency with Kyndryl Hybrid Platform Recovery Services

## Customer challenges

Organizations recognize the digital transformation and superior customer experiences offered by cloud. But a hybrid cloud environment can lead to unintended risks and increased complexity when managing resiliency. Traditional disaster recovery (DR) practices have several drawbacks:

- Manually copying data to physical media such as disks or tape is resource-intensive
- In addition, such manual backup processes are error-prone
- Retrieving backup media from an off-site location is time-consuming
- It is difficult to deliver consistent and predictable disaster recovery outcomes

## Solution highlights

Kyndryl™ Hybrid Platform Recovery Services provide DR monitoring, reporting, testing, and workflow automation for complex hybrid Microsoft Azure cloud environments. Specific features include:

- Automated recovery of physical, virtual, and cloud workloads
- Built-in continuous replication for all Azure-supported OS platforms

- DR orchestration between on-premises VMware workloads and the Azure cloud using Azure Site Recovery
- Recovery point objective (RPO), recovery time objective (RTO), data lag, and Azure cloud resource monitoring and alerts
- Real-time DR-readiness validation, automated testing, and DR health monitoring

## Customer benefits

Kyndryl Hybrid Platform Recovery Services give you push-button DR capabilities that help reliably recover critical IT, business services, and data. Top benefits are as follows:

- 1 Speed:** DR automation and testing can reduce recovery time from hours or days to mere minutes
- 2 Scalability:** A single dashboard for real-time DR monitoring and management scales across on-premises, public, private, and hybrid clouds as well as heterogenous environments
- 3 Adaptability:** Achieve reliable recovery of enterprise applications spanning multiple technologies
- 4 Predictability:** Helps meet uptime, audit, and compliance requirements

# Why Kyndryl and Microsoft?

## About Kyndryl

Kyndryl is a \$19 billion company with more than 90,000 skilled professionals operating in over 60 countries. We design, build, manage and modernize mission-critical technology systems that the world depends on everyday.

We have decades of experience working with customers to deliver enterprise-grade workload analysis, migration, implementation, and managed services for the most complex workloads.

### Providing undisputed leadership

**6.1M** mainframe installed MIPs

**300K** network devices managed

**5,200+** WAN devices managed

**3.5M** LAN ports managed

**67K+** VMware systems managed

**14K+** SAP instances managed

**3.5+** exabytes of client data backed up annually

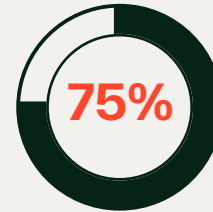

### Kyndryl competencies for Azure

- Gold Messaging
- Gold Application Integration
- Gold DevOps
- Gold Data Analytics
- Gold Data Platform
- Gold Project and Portfolio Management
- Gold Application Development
- Gold Collaboration and Content
- Gold Cloud Platform
- Gold Cloud Productivity
- Gold Security
- Gold Windows and Devices
- Silver Small and Midmarket Cloud Solutions

### Empowering thousands of customers

**4,000**

Global customers

... of the Fortune 100 and more than half of the Fortune 500

## Kyndryl and Microsoft Advantage

Kyndryl and Microsoft provide the services and solutions to meet customers wherever they are on their cloud journey: on premise, across multiple clouds, or on the edge. With our joint expertise, we work with customers to manage complexity and modernize their operations for rapid business outcomes. We bring together deep design, delivery, management, and cloud technology expertise, supported by an expansive ecosystem, to unlock our customer's potential for long term business impact.
