

Kyndryl Data Transformation Suite for SAP Solutions

Simplify your data migration process

To cut costs and risk, meet SAP ECC end-of-life deadlines and unlock the benefits of AI and cloud-based ERP, enterprises are modernizing their SAP environments. However, moving existing data to SAP Cloud ERP or other S/4HANA® deployment can be complex and poses potential risks for business disruption, delays, data-quality issues and cost overruns.

Powering intelligent data journeys

The Kyndryl Data Transformation Suite for SAP Solutions is a self-contained accelerator that simplifies the data migration process. It enables faster discovery, transformation and migration of SAP and non-SAP data—while addressing core data structures and customizations, minimizing data duplication and maintaining thorough data mapping, cleansing and validation.

Infused with lessons learned from Kyndryl's own SAP transformation, our Data Transformation Suite for SAP Solutions helps foster data integrity, security and compliance from a single source of truth from migration through production. By automating the selection and transformation of critical data, backed by structured validation techniques, the accelerator reduces the risk of data loss or corruption while accelerating time-to-value for SAP transformations.

Unlock the benefits of your Cloud ERP

1. **Accelerated data migration:** Cuts time to adopt and implement SAP S/4HANA through automated scanning, analysis, identification, transformation, migration, testing and validation of SAP data.
2. **Reduced data volumes:** Identify and avoid migrating non-relevant legacy data to the HANA in-memory database, reducing the total volume of data to shrink storage costs.
3. **Reduced risk:** Pre-configured tools eliminate manual errors, promoting data security and compliance, and reducing the risk of operational disruption.
4. **High-precision data handling and integrity:** Promotes data quality early in the configuration process to enhance project timelines and mitigate risks.
5. **Unlock the power of AI:** Boost operational efficiency and enhance decision-making by leveraging AI-driven processes and analytics in SAP S/4HANA.

Data & AI-centric strategies

Kyndryl Data Transformation Suite for SAP Solutions, in combination with Kyndryl's deep expertise in data migration and enterprise application modernization services, can simplify data migration and transformation.

Kyndryl provides enterprises with a holistic data strategy for SAP S/4HANA built on modern foundations, enabling a single source of truth based on high-quality, high-fidelity data from system analysis to migration and production. Kyndryl's migration process supports the automation of business processes through AI and generative AI solutions and provides self-service business intelligence tools to facilitate actionable insights at scale.

Kyndryl takes a data and AI-centric approach to SAP transformation to help optimize your data migration, accelerate time-to-value and mitigate business risk. We help modernize, migrate and unify data across the organization, with our Data Transformation Suite and leverage agentic AI from Nova Intelligence to quickly deliver SAP Custom Code modernization **three times faster** than average. With 30 years of experience overseeing hundreds of SAP migrations for mission-critical systems, Kyndryl helps lead and manage all phases of your SAP transformation.

Comprehensive services portfolio

Kyndryl offers comprehensive services across consulting, implementation, modernization, organizational change management and managed services to support enterprises in their SAP transformation journeys.

Key value adds

Co-creation and tailored transformation journey

in a phased approach reduces risk and increases budget certainty.

Fit-for-purpose architecture

provides future-proofing against technical debt.

Long experience in mission-critical environments

drives shorter migration cycles with reduced downtime and risk.

Cross-industry expertise and best practices

of the Kyndryl Migration Factory, combined with Kyndryl Bridge technology, enable proactive ongoing enhancements.

Cultural transformation strategies

that connect people and processes to manage and drive change effectively.

Why Kyndryl?

Kyndryl has deep expertise in designing, running and managing the modern, efficient and reliable technology infrastructure that the world depends on every day. We are deeply committed to advancing the critical infrastructure that powers human progress. We're building on our foundation of excellence by creating systems in new ways: bringing in the right partners, investing in our business and working side-by-side with our customers to unlock potential.

Connect with us

Schedule a complimentary 30-minute consultation with a Kyndryl expert to see how this solution can help ensure a fast, accurate and low-risk migration of data to SAP S/4HANA.
