

Assessment Services for Power Platform

Customer challenges

Organizations accelerating their digital transformation face challenges with outdated applications, which often need costly rewrites or rare maintenance skills. Challenges include:

- Identifying and validating legacy applications for power platform suitability
- Developing a future-state governance framework
- Adaptable modernization approach
- Resource flexibility and scalability
- Swift and Secure IT Capacity Adjustment

Solution highlights

Kyndryl helps organizations assess their readiness to adopt Microsoft Power Platform's low-code and no-code capabilities, accelerating application modernization and business transformation. Solution highlights include:

- Evaluation of a part of the customer's application portfolio for CX/UX modernization, value acceleration, or platform exit strategies
- Assessment of customer's application environment, evaluating technical debt, and creating aligned strategies to accelerate Power platform adoption
- Guiding customers in choosing and establishing a Power platform strategy, providing skills, methods and tools
- Evaluating customer's ability to extend and integrate their applications with ERP systems

Customer benefits

- 1 Clear visibility into application readiness and modernization opportunities to enable strategic decisions
- 2 Actionable roadmap aligned with business priorities
- 3 Cost optimization with reduced capital expenditure
- 4 Governance and security guidance for compliant adoption
- 5 Platform alignment recommendations for long-term value

Why Kyndryl?

Kyndryl runs and transforms the systems that the world depends on every day, serving thousands of enterprises including 60% of the Fortune 500 in more than 60 countries.

Providing undisputed leadership
