Unlock the power of agentic AI with Kyndryl and Google Gemini Enterprise

Customer challenges

Organizations across sectors face mounting pressure to boost productivity, cut costs, and make faster, smarter decisions — yet the tools they rely on often fall short.

- Fragmented systems, platforms, and file types make search inefficient

- Siloed data prevents employees from contextualizing information and extracting insights.

- Manual, repetitive workflows across disconnected systems slow down business processes

New AI-enhanced search and agentic tools offer a way out — but adoption stalls due to skill gaps, weak governance, and cultural resistance — leading to fragmented deployments that reinforce existing silos.

Solution highlights

To overcome these barriers and unlock the full potential of AI, organizations need a partner that can deliver not just technology — but transformation.

Kyndryl helps customers design, deploy, and manage agentic AI — responsibly and at scale.

By combining enterprise-grade integration, governance, and operational support, Kyndryl turns AI from a possibility into a trusted enterprise capability.
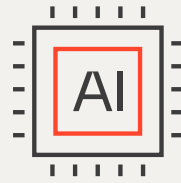

In partnership with Google Gemini Enterprise, Kyndryl delivers agentic AI that connects knowledge, drives action, and builds employee trust — on a platform built for enterprise speed and scale.

Google Gemini Enterprise enables secure, multimodal search and intelligent agent orchestration — helping employees find answers, summarize content, generate outputs, and execute processes using enterprise data.

Kyndryl complements this with deep enterprise expertise and accelerates deployment through:
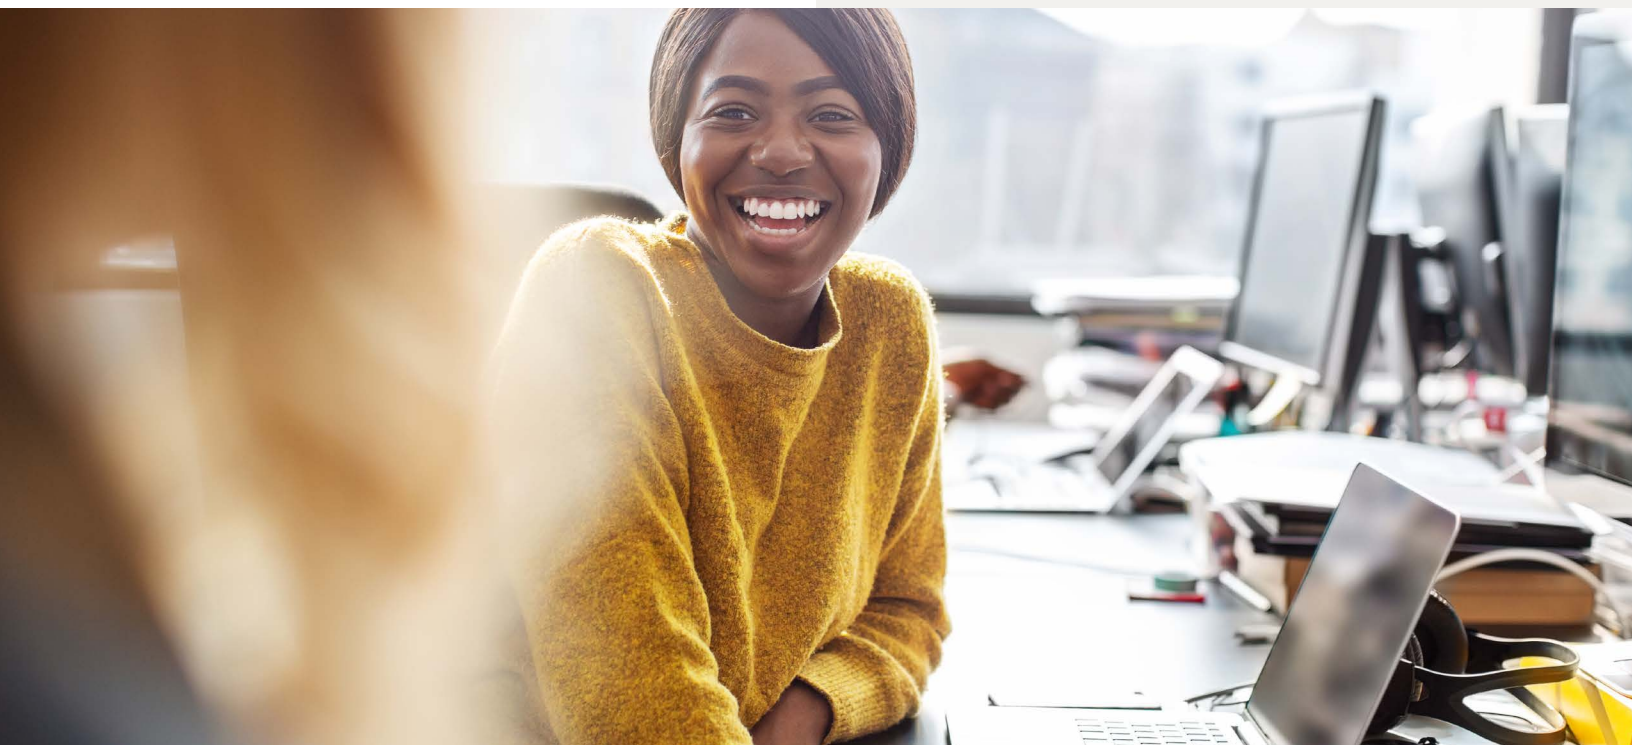

– Use case discovery and prioritization

– Workflow mapping and solution design

– Data preparation and agent integration

– Output optimization and ongoing support

With Kyndryl's end-to-end approach, organizations can move quickly and safely from AI ambition to real-world impact — while maximizing employee engagement and trust.

With agentic AI created by Kyndryl, running on Google Gemini Enterprise, organizations can:

– **Activate enterprise knowledge:**
  Deliver fast, contextual answers from structured and unstructured data across 100+ platforms.

– **Drive intelligent action:**
  Use AI agents to analyze data, support decisions, and automate workflows — no code required.

– **Accelerate adoption with confidence:**
  Benefit from Kyndryl's deep expertise to deploy and manage AI responsibly, helping to ensure compliance and resilience.

– **Boost productivity and precision:**
  Improve decision-making accuracy and reduce time-to-value across business functions.

Kyndryl and Google Gemini Enterprise: market leadership

- 5,300+ Google Cloud certifications across eight domains

- Kyndryl is a recognized Global Gemini Enterprise partner for Google across four regions

- Kyndryl named a Leader by 2025 IDC Marketscape, Worldwide Hybrid IT Infrastructure Consulting and Integration Services

- Kyndryl is redefining enterprise innovation by co-developing 100 autonomous AI agents in partnership with Google Cloud

- Kyndryl achieves Energy & Carbon Partner Designation in the Google Cloud Partner Advantage Program

Why Kyndryl?

Kyndryl has deep expertise in designing, running, and managing the most modern, efficient and reliable technology infrastructure that the world depends on every day. We design, build, manage and modernize the world's critical technology systems. As the world's largest provider of IT infrastructure services, Kyndryl is committed to the health and continuous improvement of the vital systems at the heart of the digital economy. With our partners and thousands of customers worldwide, we co-create solutions to help enterprises reach their peak digital performance.
