

# Accelerate AI transformation in private cloud

AI is reshaping industries by driving efficiency, personalization and rapid innovation across the enterprise.

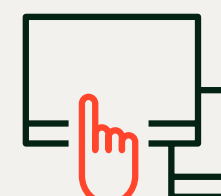

But many organizations are still struggling to turn AI ambition into AI reality.

Many companies stand at an AI crossroads. Deploying AI in-house is complex, while geopolitical shifts and evolving data regulations are driving closer scrutiny of deployment models.

**65%** of companies have adjusted cloud strategy to meet regulatory requirements<sup>1</sup>

**86%** say country of origin and regulatory alignment are increasingly important factors in the cloud evaluation process<sup>1</sup>

## Kyndryl and Dell can help.

We're working together to design and operate secure, scalable AI platforms that combine advanced AI and data capabilities from Dell with our implementation experience across infrastructure, governance and managed services.

- Enhance employee and workflow efficiency
- Drive adherence to governance and compliance requirements
- Tailor AI infrastructure for targeted AI workloads and use cases
- Protect sensitive and regulated data
- Align AI governance with sovereignty and regulatory requirements
- Accelerate AI implementation from proof of concept to production

Wherever you are in your AI transformation journey, Kyndryl and Dell can meet you there.

Let's talk. →
