## Kyndryl Cyber Incident Recovery with Veeam

### Overview

Cyberattacks are growing more frequent and destructive, putting companies at risk of having critical systems compromised, data taken hostage, and operations paralyzed. At the same time, the rise of hybrid multi-cloud environments has complicated data management and security. With data and applications now residing across multiple platforms, managed and protected using disparate solutions, ensuring everything remains protected and rapidly recoverable is tougher than ever.

While the challenge may be considerable, the good news is that businesses don't have to face it alone.

Kyndryl Cyber Incident Recovery with Veeam takes the complexity out of cyber resilience, providing a fully managed service for data backup and recovery. The solution offers you the best from two industry leaders: Kyndryl's proven cyber resilience expertise combined with Veeam's powerful data resilience capabilities.

This combination delivers cutting-edge automation, orchestration, and real-time validation capabilities to simplify and strengthen your recovery efforts. You gain the ability to rapidly and effectively restore vital systems across your entire infrastructure, minimizing downtime and business impact, no matter what threats may emerge.

## Hybrid infrastructure brings heightened risk

As organizations worldwide embrace hybrid multi-cloud environments and next-gen workloads, they face fresh challenges in protecting critical data and systems. Many rely on siloed solutions for data management and protection, which limit visibility and complicate recovery efforts. Manual intervention often becomes necessary, resulting in slow, unreliable, and error-prone restoration processes that damage business continuity service level agreements (SLAs).

What's more, relying on multiple cloud platforms and enterprise applications requires expertise in diverse technologies and environments. However, demand for skilled IT professionals still outpaces supply in most markets, making it difficult for organizations to attract and retain the talent they need. Without this expertise, many businesses struggle to manage and secure advanced technologies and complex deployments, leaving a gap in their security posture.

## Fully managed recovery from Kyndryl and Veeam

Kyndryl Cyber Incident Recovery with Veeam provides fully managed data backup and recovery for business-critical applications and data. Our solution delivers comprehensive protection through our combined expertise, giving you access to proven cyber resilience from Kyndryl and market-leading data resilience from Veeam.

Together, we provide a unified foundation to understand your exposure and recover operations with confidence, delivered by experts in cyber and data resilience. Kyndryl Cyber Incident Recovery minimizes the business impact of cyberattacks by enabling the automated recovery of data and restoration of critical business processes across the entire IT infrastructure.

### Key features include:

- **Flexible deployment** from on-premises to cloud.
- **AI-powered defense** with intelligent malware detection.
- Multiple **immutable storage** options for ultimate data protection.
- Seamless **recovery rehearsals** and **expert-led recovery** operations.
- **Automated data protection and recovery** workflows.
- **Real-time monitoring and anomaly detection**, plus comprehensive reporting.
- **Complete workload coverage:** physical, virtual, cloud-native, SaaS, and Kubernetes.

## Maintain business continuity with confidence

Kyndryl Cyber Incident Recovery with Veeam allows you to rapidly restore vital systems and maintain uninterrupted business operations, whether on-premises or in the cloud. Kyndryl and Veeam experts continuously monitor, manage, and optimize your backup and recovery infrastructure, so you enjoy always-ready protection without the overhead of managing complex systems yourself.

### Kyndryl Cyber Incident Recovery with Veeam:

- Minimizes the impact of cyber incidents through swift, efficient recovery.
- Reduces the need for in-house expertise and simplifies cyber resilience in hybrid environments.
- Improves business agility and ability to unlock insights from data.
- Simplifies compliance with evolving regulatory requirements.
- Provides peace of mind through always-available, fully protected data and applications.

## One partnership for unmatched protection

Together, Kyndryl and Veeam deliver comprehensive cyber resiliency solutions that combine the benefits of managed services, expert infrastructure management, and secure data foundations.

- Kyndryl is the world's largest IT infrastructure services provider, with deep expertise in managing mission-critical systems.
- Veeam is the #1 global market leader in data resilience, trusted by 550,000 customers worldwide.<sup>1</sup>

## Why Kyndryl?

Kyndryl has deep expertise in designing, running, and managing the most modern, efficient and reliable technology infrastructure that the world depends on every day. We design, build, manage and modernize the world's critical technology systems. As the world's largest provider of IT infrastructure services, Kyndryl is committed to the health and continuous improvement of the vital systems at the heart of the digital economy. With our partners and thousands of customers worldwide, we co-create solutions to help enterprises reach their peak digital performance.
